AOGX Whitepaper

The Ark of Genesis whitepaper outlines the architecture, token mechanics, and long-term ecosystem vision behind AOGX. The system combines Genesis Gates progression, deflationary tokenomics, decentralized liquidity access, and a growing membership-driven partner network.

Ark of Genesis • Official Whitepaper PDF

Official Token Contract (ERC-20)

0xc26cfa8065264525257feba23278510b7713abc9

Main ERC-20 contract that stores balances and records all token transfers.

Presale Contract (with mechanics)

0xa2d056a19B58e140b5fff062fFEC80126f0e72Fc

Buy Tokens handles purchases, pricing, distribution, Gates progression, and stage mechanics.

Whitepaper Thesis

A staged, deflationary ecosystem designed for real utility.

AOGX is built around transparent tokenomics, Genesis Gates progression, decentralized liquidity access, and a structured membership-based ecosystem. The objective is not short-term hype, but controlled expansion through utility, participation, and long-term network growth.

Ecosystem Positioning

More than a token.

Ark of Genesis is evolving into a global membership and partner network where communities, businesses, and digital value converge inside one expanding ecosystem.

Execution Logic

Unlike many token launches, AOGX already combines token deployment, active DEX access, Gates mechanics, and membership architecture as the base layer for ecosystem expansion.

Ecosystem Architecture

How the Ark of Genesis ecosystem is structured.

AOGX Token

The core digital asset of the ecosystem, used for access, qualification, and network participation.

Membership Logic

Wallet holdings define access level, tier, and eligibility inside the ecosystem.

Partner Network

Businesses connect to the member base through structured offers, benefits, and ecosystem visibility.

Benefits & Utility

Members gain access to real offers, discounts, services, and future ecosystem rights.

Network Growth

As members and partners grow together, the ecosystem gains stronger utility, retention, and value.

Gate to Ecosystem Evolution

From token launch mechanics to network development.

Genesis Phase

Before the Gates, Ark of Genesis established the token, smart-contract infrastructure, website, liquidity base, and core system foundations.

Gate I - Awakening

The presale begins. The journey becomes active and the first Gate opens.

Gate II - Whispering Truths

Early holders appear, awareness grows, and the ecosystem foundation becomes visible.

Gate III - Path of Hope

Internal processes are aligned, growth channels are prepared, and the system gets ready for wider participation.

Gate IV - Rising Shadows

Early ecosystem activation begins with stronger partner preparation, real use-case direction, and visible operational structure.

Gate V+

The network transitions from token mechanics into active utility, member growth, partner expansion, and long-term ecosystem scaling.

Genesis Gates

15 Gates. One Ark. All Gate prices are defined in ETH. USD values are approximate reference equivalents only.

Gate I

Awakening

Every great journey begins quietly… until now.

0.0000001372 ETH • I$0.0005000

Gate II

Whispering Truths

You might hear them… if you dare to listen.

0.0000001852 ETH • I$0.0006750

Gate III

Path of Hope

Some say this road leads to something greater.

0.0000002500 ETH • I$0.0009113

Gate IV

Rising Shadows

The closer you get, the longer the shadows grow.

0.0000003376 ETH • I$0.001229

Gate V

The Oath

Once you cross, there's no turning back.

0.0000004557 ETH • I$0.001659

Gate VI

Echoes of the Ark

A distant sound… like walls breathing, waiting for you.

0.0000006152 ETH • I$0.002240

Gate VII

Trial of Will

The Ark won't wait forever. Neither should you.

0.0000008305 ETH • I$0.003025

Gate VIII

Call of the Chosen

It doesn't call everyone. But if you hear it… you can't ignore it.

0.0000011212 ETH • I$0.004084

Gate IX

Veil of Secrets

Some truths aren't meant to be seen. Until you step closer.

0.0000015136 ETH • I$0.005514

Gate X

Sanctum of Light

Light can be a lie. Or a promise. You decide.

0.0000020434 ETH • I$0.007443

Gate XI

The Ascent

Every step feels heavier. But you keep moving.

0.0000027586 ETH • I$0.010038

Gate XII

Harbinger's Call

Something stirs behind the walls. It knows you're close.

0.0000037241 ETH • I$0.013552

Gate XIII

Judgement Dawn

Not judgement. Just consequences. For choosing to walk this far.

0.0000050276 ETH • I$0.018295

Gate XIV

Final Passage

One last step. Whatever waits beyond, there's no way back.

0.0000067872 ETH • I$0.024708

Gate XV

Ark Arrival

The journey ends. Or maybe it finally begins here.

0.0000091628 ETH • I$0.033355

Tokenomics

Fixed supply. Structured distribution. Deflationary progression.

Total Supply

20,000,000,000 AOGX

No additional tokens will ever be minted.

Deflation

1% burn at 99%

1% is burned when a Gate reaches 99% completion to unlock the next Gate.

Presale Allocation

40% (8,000,000,000 AOGX)

Genesis Gates allocation.

Buyer Delivery

Instant

Presale buyers receive tokens directly to their wallet.

Presale (Genesis Gates)

40%

Community & funding

Reserve

15%

Future Arks & emergency

Liquidity

8%

CEX + DEX

Strategic Partnerships

8%

Partners & VIP investors

Team & Advisors

17%

9-month vesting

Marketing & Hype

12%

Growth & exposure

Presale Price Growth

Progression built into the Gates.

Starting Price

0.0000001372 ETH

H $0.0005000 (Gate I)

Final Gate Price

0.0000091628 ETH

H $0.033355 (Gate XV)

Total Raised

15,500 ETH

H $67.6 Million

Why AOGX

Why now

- Gate pricing creates visible staged progression, rewarding earlier participation without abandoning long-term structure.

- Only 40% of total supply is allocated to presale, preserving scarcity and strategic allocation discipline.

- AOGX is tied to membership logic, ecosystem access, and partner utility rather than pure speculative narrative.

- The project already combines token deployment, DEX access, and membership architecture instead of postponing utility to the future.

- Growth is approached with liquidity, structure, and stability in mind rather than rushing into unsustainable hype cycles.

Liquidity & Market Access

Live decentralized access before centralized exchange expansion.

- AOGX already has decentralized market access through AOGX / ETH on Uniswap V4, AOGX / WETH, and AOGX / USDT on Balancer.

- The token may also be accessible through compatible wallet routing and swap aggregators, including Binance Wallet interfaces.

- The project does not rush into centralized exchange listings. Ecosystem maturity, liquidity depth, and healthier market structure are prioritized first.

- Liquidity pools are continuously strengthened using ecosystem funds according to tokenomics and strategic allocations.

Security & Transparency

Mechanics, not shortcuts.

- Contract ownership has not been renounced because Gates progression and burn logic require active mechanics in the presale contract.

- Token supply is fixed - no minting is possible.

- The core contract logic enforces the staged system and prevents arbitrary token manipulation.

- Tokens purchased through presale are delivered instantly to the buyer's wallet - there is no investor vesting for buyers.

- Team allocation is restricted by vesting.

Audit & Trust

Strong public trust indicators.

> **Trust Score: 90.36**
>
> Contract Transparency: Strong
> No Mint Function • No Proxy • No Hidden Owner • No Self-Destruct
> 0% Buy Tax • 0% Sell Tax

Closing Statement

This is not the end. This is the beginning.

Ark of Genesis is built around transparency, fixed supply discipline, staged progression, decentralized market access, and long-term utility-driven ecosystem growth. AOGX is designed to evolve beyond a token model into a broader membership and partner network.
