ARK OF GENESIS

THIS IS NOT THE END. THIS IS THE BEGINNING.

Ark of Genesis – a unique Web3 journey that merges decentralized funding with a future that can be touched. It is not just a digital token or a financial product – it is a story, a movement, and a step toward something far greater than the virtual world.

No one truly knows what lies within the Ark of Genesis.
Some believe it to be an autonomous fortress, others – a sanctuary of future technologies.

But everyone agrees on one thing:
with every Gate we open, we step closer to the truth.

The only question is:
What awaits us inside the Ark when the final Gates unlock...?

ARK OF GENESIS – THE GATES LORE

The journey to the Ark is divided into 15 Gates.

Each Gate represents a stage of progress, a psychological and financial milestone, and a new step in uncovering the Ark's secret.

How it works

Gates open only when the previous one is fully completed – there are no shortcuts. At 99% completion, 1% of that Gate's tokens is burned, destroying the “old Gate” and unlocking the next one.

Every Gate has a name, a mystery, and a unique story.

ARK OF GENESIS

ROADMAP

The roadmap is designed for a steady and strategic journey – 15 Gates opening step by step.
But this is Web3... and Gates don't always wait. If the hype ignites and the community decides to rush in, what was meant to last months might be gone in just a few days.

We plan for stages. But who can plan FOMO 😊?

15 Gates. One Ark.

Only those who walk the journey will discover the truth.

This is not the end. This is the beginning.
